

cord & reel awning

fixed guide awning system

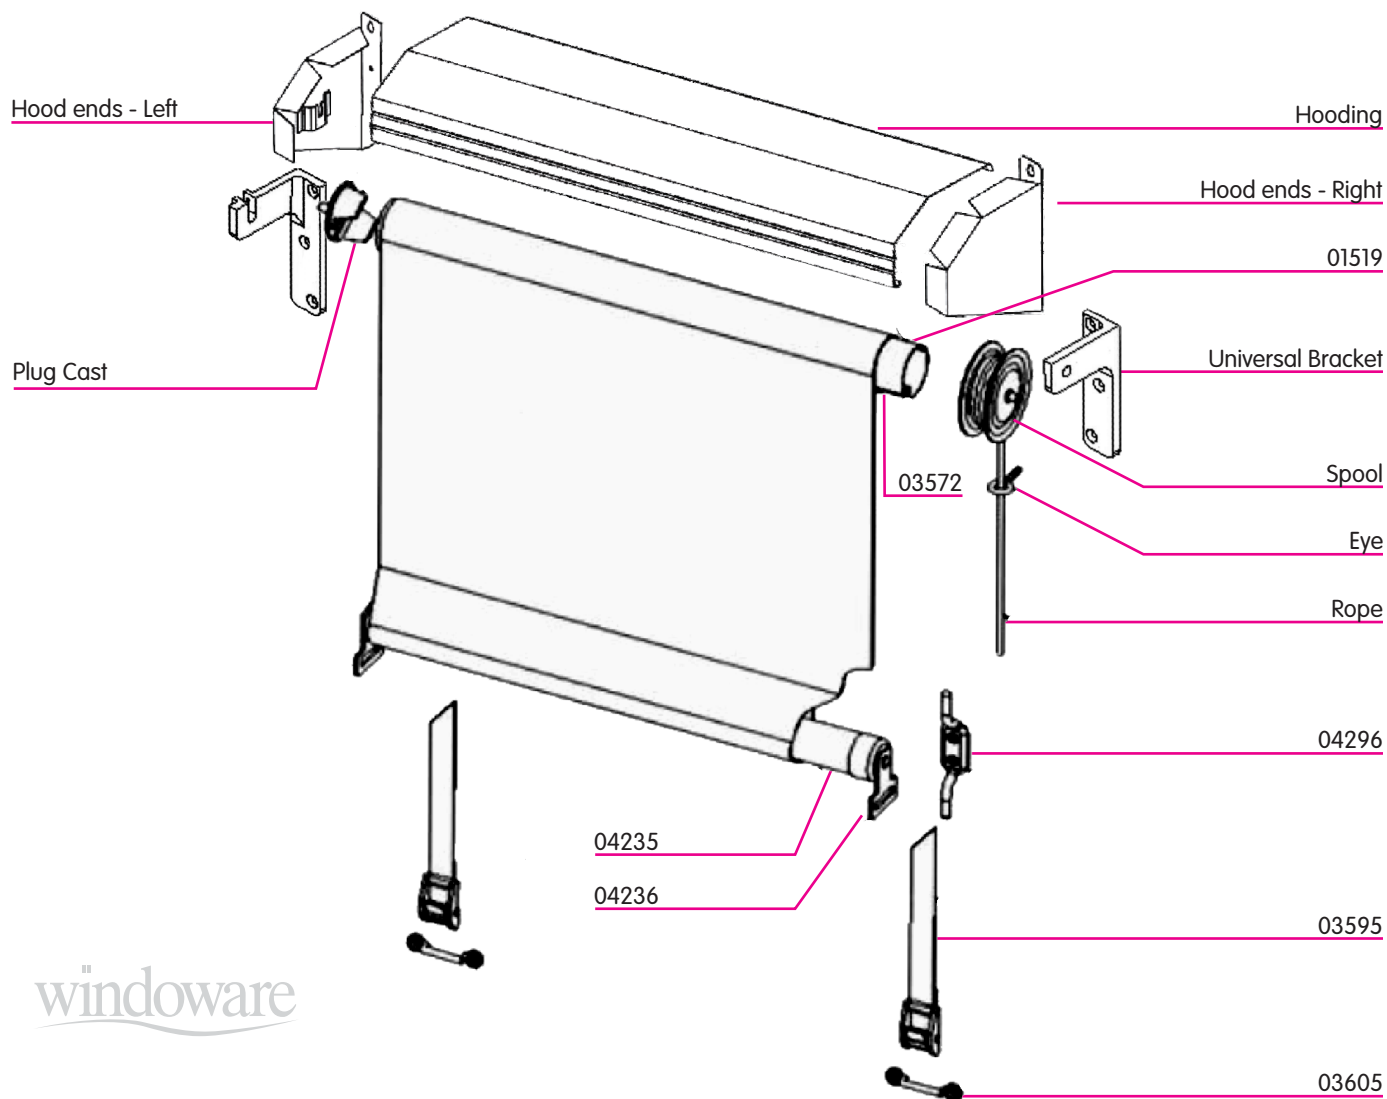

a cost effective shade solution

The cord and reel is a traditional style straight drop verandah blind that is simply operated by pulling a rope that retracts the awning and secured at any height by using a cleat and the supplied cam lock buckles. An automatic awning hood can be used to increase the protection of the fabric and also provide a consistent look when combined with our other products. The hoods are available in a range of Colorbond equivalent colours; White, Off White, Smooth Cream, Paperbark, Slate Grey, Heritage Red, Mist Green, Federation Green, Wheat and Black. The cord and reel is most commonly used as an economical solution for enclosing decks or patios and features a durable keyway and a galvanized base rail inserted into a fabric pocket. A massive range of fabric designs and colours are available to satisfy all customers!
